

**TOP 3 AI TOOLS
TRADERS USE TO
MAXIMIZE PROFITS**

Praise for *Hima Reddy Trading*

"I installed the RSI Power Zones indicator and it is just amazing how accurate it is – on all markets. It actually gives **advance warning** before the price moves!!" -- David H.

"Hima, I value your insights, your momentum indicator is an integral part of what I have put together. I believe I am ready to go from paper to live trading." - Jim B.

"I love the RSI Power Zones. It's like a light bulb went off in my head. Priceless :) Thank you ~ Mitchell S.

"I was very impressed with the education Hima provided that came with my indicator. Hima's RSI Power Zones indicator has become THE standard on all of my charts." - Rob C.

"A day after learning one of Hima's RSI Power Zones trend continuation entry signals, I tested it out on a 5-minute chart of Tesla. With this one trade I made over triple digits, covering the cost of her newest course" - Norman C.

"I got your RSI Power Zones training and the next morning on the market open I found UNH as a short candidate using the weekly chart. By the time I sold the position, it nearly paid for the whole course! Thank you for sharing your knowledge and keeping your content reasonably priced." - Aaron R.

"My FIRST month using RSI Power Zones was also my BEST trading month so far!" - Susie M.,

"What caught my attention was your RSI power zones. I have been trying to figure out how to customize the RSI and the MACD with success on and off. RSI Power Zones in combination with the FaceOff methods is awesome. This will allow me to take my Trading to a whole new level. Success to be continued...Thank You" ~ Todd T.

"I'm in Australia and I trade CFDs. The US 30 (follows the Dow) showed an RSI Power Zones continuation pattern. The signal came and a 30 point drop followed. Great Power Zone result!" ~ Henry V.

A Quick Note from Hima

This is your BONUS accompanying your momentum ebook!

The AI Tools I've laid out are NOT what you think. They address super important parts of trading that no one else is talking about.

We live in a world where AI is everywhere. You might wonder how to use AI in trading. I have some tools that I use that help me trade better and save time.

So, we're in a world where AI has completely taken over. It's hard to imagine a time when we didn't see that at least once a day in our news feed or in our web searches. And you may have been wondering, what are some great ways that I can use AI in my trading?

Well, I'm here to tell you that there are some ways that I use AI in my trading that are actually not plug-ins from my charting software or signal generators or anything that you might think is obvious.

They're tools that help me have the life of a trader to do more with less time and less energy.

Can't wait for you to dive in!

Founder & Head Trader

HimaReddy.com

AI Tool #1: Loom

The first tool is called Loom. It's a video recording software that lets you capture your screen. Use it after you finish day trading or swing trading. Record your screen, talk about what you did, and name the video with a lesson from the session and the date. Review these videos each week to learn from them.

So the first one I want to introduce you to is an AI-generated tool technically, and it's called Loom.

Now, this is a video recording software that allows you to take captures of your screens, and I recommend doing this process every time you finish day trading or every time you finish a swing trade.

The great thing about Loom is it doesn't require any special software. You can just pull it up on a web browser, set up a free account, tie it to your Google, and when you do that, you can go ahead and actually then record your screen.

This is best done if you have annotated your charts with what trades you made. Now, you're just talking through what you did, and again, Loom is best used immediately after you've completed trades.

What I do is I name the Looms per an important lesson from that trading session, and I also put the date of the trading session in the Loom title.

I keep tabs on them, and I review my daily captures each week, and I take notes on those. So I'm constantly building up a pile of key takeaways that can help me make my strength stronger and reduce my weaknesses.

Screen capture has gotten a complete AI boost with Loom, and you can use that in your trading review, which is a super important part to your trading.

AI Tool #2: Glasp

Another tool is Glasp. It's for YouTube, where there are many helpful trading videos. Glasp creates AI-generated transcripts of videos, so you can read them instead of watching them. Install it in your Chrome browser to use it.

Another tool is called Glasp. Now, this tool is specifically for YouTube, and as you know, there are many, many amazing trading resources out on YouTube. There are tons of videos. I have my own channel, @himareddycmt, and all of these are great resources that you might enjoy.

Now, I know that some of you are more readers than listeners. Perhaps you studied in a way that was more text to ingest as opposed to video, or perhaps that's just how you learn fastest.

So I am more of a video teacher, but Glasp allows you to take the video I share on a YouTube channel and create an AI-generated transcript. It may not have every single word exactly right. It won't have the exact phrases that a trader would know, but it will get the gist of it.

And when you are in a situation where you want to read, but the video provider didn't provide you with subtitles or a transcript up front, you can use Glasp to do this.

This is a plugin that you can install in your Chrome browser, because Google Chrome browser, YouTube, right, well, I'm a happy family under Google, and put this together.

AI Tool #3: AudioPen

The third tool is AudioPen.ai, which is like a voice memo app but better. As a trader, sometimes you get ideas and want to record them quickly. AudioPen lets you record your thoughts, then it creates a transcript and a summary of what you said. This helps you remember your ideas and process your thoughts when you're frustrated or need help.

You can use AudioPen on your phone or web browser, then access the information on different devices. Try using these AI tools to improve your trading skills and save time. I like to use the AI summary as an outline. Then, I check the full transcript to add important details.

Now the third tool is probably my favorite. In fact, I am using this tool right now to create this list for you. It's called AudioPen.ai. For those of you who have an iPhone like I do, think of your voice memo feature. This is like a voice memo on steroids.

As a trader, whether you're a beginner, intermediate, or advanced, you're going to have moments in your trading where you suddenly get an idea and you want to jot it down quickly. The thing is, it might be faster for you to speak it through, but then the limitation of a traditional voice memo is that you have to go back, listen to the voice memo, and write it by hand or turn it into a to-do list, right? Nobody wants to do that.

AudioPen.ai is great because you can use it like a voice memo. So you can hit play, record away. If you use the free version, you have a five-minute limit. If you use the paid version, you have a 15-minute limit. And when you do this, you actually can create a situation where you can speak freely, right?

You can walk and pace like I'm literally doing right now in my office. And then once you get your thoughts out and you hit the stop button, two things will happen that are pretty amazing.

The first is that the AI will create a transcript of everything you said. So again, you won't have to go sit and listen and type everything. It'll have a raw transcript of the exact words. Again, you may have to adjust for any phrases like trading terminology.

The second thing, which is the really, really extra cool part, is that it will create an AI summary of what you said. I mean, how many times have you vented to somebody or just rambled in an audio

voice memo like I have, and it's all just you all over the place? This amazing second feature of AudioPen actually takes all your swirling thoughts and consolidates them.

So once all that processing is done, you'll be left with two things, a summary and the full complete transcript.

I actually recommend using this as often as you'd like, because it's great for those moments where, let's face it, you're going to get frustrated in your trading. You're going to have a bad trading day or a bad trade, and you may not have a mentor like me to reach out to immediately. Well, what if you were able to turn around and provide yourself with the ability to process through your thoughts?

You can't go yell at your wife or your kid, but you can talk to your phone, or you can actually use AudioPen.ai in a web browser, which makes it even better. So you can use it on your phone or your web browser and then cross-access information.

So what happens to me a lot is I'll access it on my phone, I'll record on my phone, and then I'll kind of let it stew for a while, but then I may want to translate that to my trading journal. So I go open up my PC, yes, I use an iPhone, but I trade on TradeStation, which is best on a PC, and then I open up AudioPen on the PC, and then I'm able to take either the full raw transcript and review that, or the AI summary or a combination of both.

Something I like to do is take the AI summary, make it an outline, and then review the full transcript to interject any details that I don't want to lose track of.

Next Steps

Again, all of these that I just shared are free tools, they have free versions, and they can help you for the side of trading that others aren't talking about. The mental side of trading, the inner side of trading, the mindset side of trading, that is so important to dive into as you also dig into your content that you're going to be learning with me, starting here with momentum and how to boost your trading with it.

So I'm really excited for you to give these tools a try, all of the links are in this PDF, and if you have any questions you can reach out to our team.

Remember, you got this resource as a BONUS with my education on trading momentum. The Winning RSI Playbook dives into that powerful concept. And to take it to the next level, I strongly encourage you to take advantage of my favorite strategy for leveraging the RSI: The Bull Bear RSI Faceoff.

It will show you exactly what rules I use to leverage this strategy for phenomenal profit potential. You will get all of my entry and exit rules, plus a few cool bonuses I have just for members!
